2009 IBC Significant Changes

This seminar overviews the changes from the 2006 to the 2009 IBC®. Upon completion of the seminar, participants will be better able to identify the most significant differences between the 2006 IBC and the 2009 IBC; explain the differences between the current and previous editions; identify changes in organization and code requirements; and identify the applicability of design, plan review, and inspection requirements. This course uses the *Significant Changes to the IBC 2009 Edition* by Doug Thornburg and John Henry.

Instructor: John Gibson

John is a Technical Advisor and instructor for the International Code Council. A certified Master Code Professional and Certified Fire Marshal, he holds 40 other certifications, including 33 from the ICC. Having earned a B.S. in Engineering from the University of Delaware, he also studied Architecture at Georgia Tech and completed courses in Emergency Management and Fire Prevention at the National Emergency Training Center. Formerly the Director of the Dept. of Permits & Inspections for Frederick County, MD, John is an ICC Honorary member, has served on the ICC Evaluations Services Board of Directors, the ICC Code Correlating Committee, the Board of Directors for BOCA International, Inc., Maryland's Governor's Smart Code Strategy Group, has chaired the ICC Board for International Professional Standards, and is an Honorary Member and Past President of the Maryland Building Officials Assn. He currently teaches ICC administrative, building, residential, property maintenance, zoning, green building, wildland/urban interface, and energy courses. He is an online instructor for Red Rocks Community College (Lakewood, CO) and a contract instructor at the Dept. of Homeland Security (Emmitsburg, MD).

Friday, October 8

NFPA 25 (2008 Ed.) Standard for the Inspection, Testing & Maintenance of Water-Based Fire Protection Systems

This seminar provides a comprehensive review of the 2008 edition of NFPA 25. Attendees will learn the scope of the standard, the owner's responsibilities, requirements for record keeping, as well as the liabilities associated with performing this work on a contracted basis. The changes from the 2002 edition will be highlighted along with the ongoing interpretations of how to apply the requirements of the standard. Attendees will participate in an in depth discussion regarding the inspection and testing of wet and dry sprinkler systems, standpipe and hose systems, fire pumps, and the associated valves used in these systems. Attendees will leave the seminar with a greater understanding on how to apply the requirements for all water-based systems. If you are a contractor, inspector, building owner or manager, AHJ, or engineer this seminar is for you.

Instructor: Russ Leavitt, SET

Russ is the Executive Chairman of Telgian Corporation. Telgian provides a wide range of fire protection and life safety services including fire systems engineering and design, code consulting, loss control engineering, construction management, and the inspection and testing of systems. He is a graduate of the University of Nevada, Las Vegas, holds a Level IV certification from NICET in Fire Sprinkler Layout, and is a Certified Fire Protection Specialist. He is a licensed contractor in 40 states and has 29 years of experience in the design, installation, and testing of fire protection systems. He serves as a principle on the NFPA 13 Technical Correlating Committee, the NFPA 25 Technical Committee, and the NFPA 5000 (building code) Technical Correlating Committee. Russ conducts seminars internationally for Authorities Having Jurisdiction, contractors, and engineers on a variety of fire sprinkler subjects and has authored a number of articles and training materials including the AFSA's [Study Guide for NICET certification in Inspections and Testing](#) and the AFSA eCampus hydraulic calculations courses. Russ is a member of NFPA and SFPE.
